<div align="center">Assignment Name or Title</div>

Indent to begin a paragraph. Double space. Use Times New Roman font. Have 1"
margins all around. Begin your document with a left-aligned "Heading" which contains four
lines of info as above. Center-align your title under the last line of your heading, with no
additional space between. For documents of more than one page, use your word processing
program's header feature to include your last name and page number in the upper right. This is
the only part of your paper for which the 1" margin rule does not apply.
